

```
1:
2: import java.util.Scanner;
3: public class Debug1 {
4:
5:     public static void main(String[] args) {
6:         // TODO Auto-generated method stub
7:         String name;
8:         int age;
9:         Scanner input = new Scanner(System.in);
10:        System.out.print("Please enter your age >> ");
11:        age = input.nextInt();
12:        // you need to swallow the dangling new line
13:        // this does not allow for the name = input.nextLine();
14:        // to work properly
15:        input.nextLine();
16:        System.out.print("Please Enter your name >> ");
17:        name = input.nextLine();
18:        System.out.println("Your name is " + name +
19:                           " and you are " + age + " years old");
20:    }
21:
22: }
```
